### MARE FEES

#### BOARDING FEES AT Equine Reproduction Centers - per day:

Mare **\$25.00**

Mare & foal **\$30.00**

*Board fees are payable directly to Equine Reproduction Centers. To minimize boarding costs, it would be best for the mare owner to have their mare ready to be bred soon after she arrives.*

*We highly recommend that all mares and stallions be put on Platinum Performance prior to breeding as the Omega-3 fatty acids (FAs), antioxidants and carnitine is a foundation for continued reproduction: however, supplementation with these nutrients can actually contribute to enhanced fertility and reproductive success in addition to a well-balanced diet in horses.*

#### BREEDING THROUGH ONE HEAT CYCLE PACKAGE

This includes all follicle palpations/rectal exams, speculum exams, artificial inseminations (shipped, cooled semen), and ultrasound examinations. It also includes the cost of HCG for close prediction of ovulation. This fee will *not* include any uterine diagnostics (culture and/or biopsy), treatment (oxytocin, flushing, antibiotic infusion), or sedation if needed. If these procedures need to be performed, it will be at an additional cost.

Pregnancy examinations are *not* included in this package. Ultrasound pregnancy examinations are recommended at 15, 30, and 45-60 days. Clients are welcome to leave their mare at the Center for pregnancy examination if they wish.

**TOTAL \$468.00**

#### FROZEN SEMEN INSEMINATION

The same services are provided as above. This includes HCG or Deslorelin as an ovulatory drug. It would be highly recommended that at least two insemination doses be made available per breeding cycle.

**TOTAL \$625.00**

#### LIVE COVER

If you plan on live cover, please contact us for associated mare/stallion handling fees.

## **STALLION COLLECTION AND PROCESSING**

*(Note, these fees are for Cooled Semen Processing, Please see Frozen Semen Rate Sheet for Frozen Semen Collection, Processing, Shipping and Storage fees).*

**Phantom Collection Training is a \$650.00 fee**  
**Pre-evaluations for future collections \$250.00\***  
**Semen Collection and Processing is \$375.00**  
**Disposable Shipping Container fee is \$40.00**  
**Board of a Stallion is \$30.00 per day**

The \$415.00 Collection and Container fee will be charged to the responsible party for the AV collection and semen processing. Some stallion owners may elect to accept this cost themselves, or they may pass it on to the mare owner.

If our Equitainer is used to hold the semen there will be an Equitainer rental fee of \$100.00. We do not rent Equitainers for shipping, a disposable container must be purchased.

In addition to the above services, *FedEx*, courier and/or air transport may/will be involved. *FedEx* next day delivery fees vary with the destination (~\$40.00 and up). A fee will be incurred if a courier is needed to pick up/deliver semen at *FedEx* or the airport (~\$30.00-\$105.00). The fee is dependent on location and time of day. You can go online to [www.FedEx.com](http://www.FedEx.com) to get a shipping cost quote. The fee to purchase a disposable container is \$40.00.

\*Please note that all Stallions to be collected for shipment at Equine Reproduction Centers must first be pre-evaluated which includes reproduction evaluation, EVA test, collection and testing of one ejaculate to acquire an optimal cooling protocol. Testing will be to evaluate samples for progressive motility 12, 24, and 48 hours after collection in extender containing Amikacin sulfate and with no antibiotic.

## **MISCELLANEOUS FEES**

Field calls **\$50.00**  
Ultrasound reproductive tract exam **70.00**
